

A day of hope – service activity with Mumbai Street Children

Rice Drive – a service project organised by grade 11 IB students raised nearly 500kg of rice for street families.

Service learning is a key part of GICLM school education. From an IB CAS initiative our students spent time with those less fortunate than ourselves teaching them Maths and then donating precious rice to their families. Perhaps the greatest learners are our students who realise that they can make a difference to other people. One day they might even start projects connected to their companies and businesses.
